

WE KEEP THE WHEELS  
ROLLING...SAFELY™

SleepSafe® Drivers provides Fleets and High-Risk Occupations with a complete turn-key and cost effective program for sleep apnea and fatigue management. Our solutions include both portable and comprehensive sleep services with best in class turnaround times and compliance results.

**“I believe this sleep apnea  
program literally saved my life.”**

Million Mile Safe Driver in SleepSafe® Driver Program

# SLEEPSAFE® DRIVERS PROGRAM OVERVIEW

## → SLEEPSAFE ON-SITE™ DIAGNOSTICS TESTING

We offer both portable and in-lab testing for your drivers at the location of their choice with FDA and AASM approved devices. This allows rapid turnaround times of 1-2 days. Our Clinical team has direct experience conducting thousands of portable tests and our unique SleepSafe Sure-ID™ process ensures accuracy and mitigates chain of custody test fraud concerns.

## → SURE-COMPLIANCE™ TREATMENT

Our documented track record for compliance is 96%, versus an industry average of just 50%. When a driver fails treatment, their CDL is at risk, creating additional costs and delays for the employer. SleepSafe® Drivers' treatment plan manages employers' cost by ensuring high compliance, with driver compliance data sent directly to your safety managers for DOT ME reporting.

## → ECONOMIC & SAFETY BENEFITS

### Documented reductions in accidents & expenses

Our multi-year sleep study with J.B. Hunt, published at the 2014 SLEEP Conference, documented:

- 53% reduction in accidents
- 55% reduction in hard braking
- 56% reduction in medical costs

It is expected that these combined reductions will more than pay for the cost of the program, driving a positive ROI.

We also expect that you will notice significant savings from lower Workers' Comp payments and sick-day expenses, as well as reduced liability and insurance costs over time.
